

LABORATORY DESIGN & SUPPLY

With over 25 years of business, we represent your single source for laboratory solutions!

Dr. Marc Panton **Chief Executive**

We are a top-tier laboratory design and services company serving the United States, all USA Territories, and Canada. We are also GSA certified.

Our Laboratory Design Division of certified, licensed, and insured experts is staffed with professional designers/consultants and the most up-to-date drafting and CAD equipment.

The LabDS Laboratory Installation Division provides the most cost-effective solutions for new and existing renovation, laboratory design, and lab furniture.

In addition, we specialize in Fume Hoods and stainless steel. We also have expertise in Phenolic Resin, Epoxy, Polypropylene, Wood, Laminate and Steel.

With 25 years of experience, we know the industry well! Our customized design systems follow ADA guidelines, and are structured to meet the needs of the industrial, education, healthcare, government, and pharmaceutical communities.

OUR SERVICES

We have a solution for every situation. See how LabDS can assist your laboratory needs!

Laboratory Design and Consulting

From concept to final installation, LabDS is your single source for lab consulting and design services.

This includes green lab design options regardless of the size or category of project.

Fume Hood and Laboratory Installation Services

LabDS provides a full service to meet all your laboratory installation needs. Our installers pay attention to every detail to ensure your satisfaction.

Be it your laboratory casework, fume hoods, acid-resistant blowers, or lab fixtures, we will maximize your uptime and minimize the downtime on your project.

Laboratory Relocation

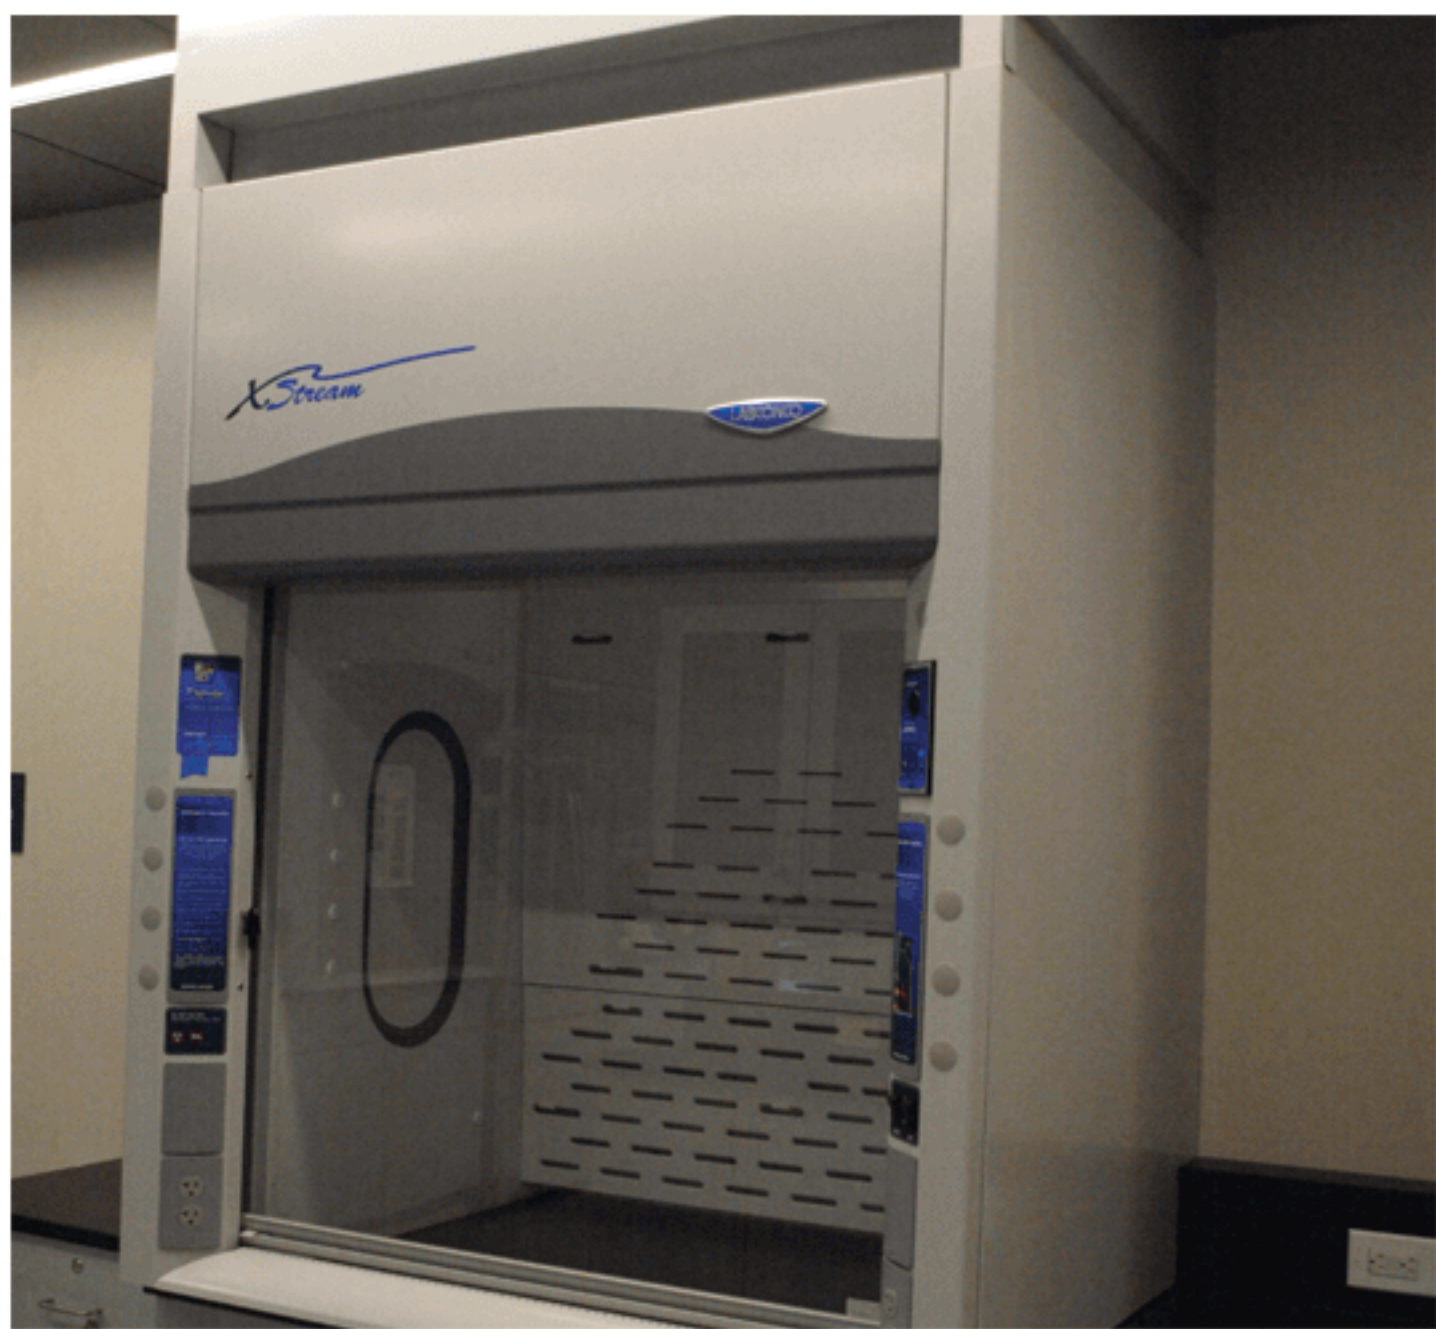

With many facilities and corporations expanding, or relocating their facilities, LabDS takes the precision and care to ensure an efficient transfer and fit for the new site.

Careful to preserve materials and maximize the efficiency of space, we use a carefully curated system to make certain your results not only survive the move but thrive after.

OUR SERVICES

Our suite of solutions, customized to secure your results!

Fume Hood Certification

Using state of the art airflow monitoring equipment, our team of Certified Experts will test your fume hoods to make sure they are operating at optimal airflow levels.

After the testing is completed, our clients receive a detailed report documenting their airflow levels.

Laboratory Renovation

We help clients keep their own space with no need for new leases, build-outs, and construction contracts to worry about.

LabDS will develop an Expert Plan to keep your own space that meets both your financial and operational needs.

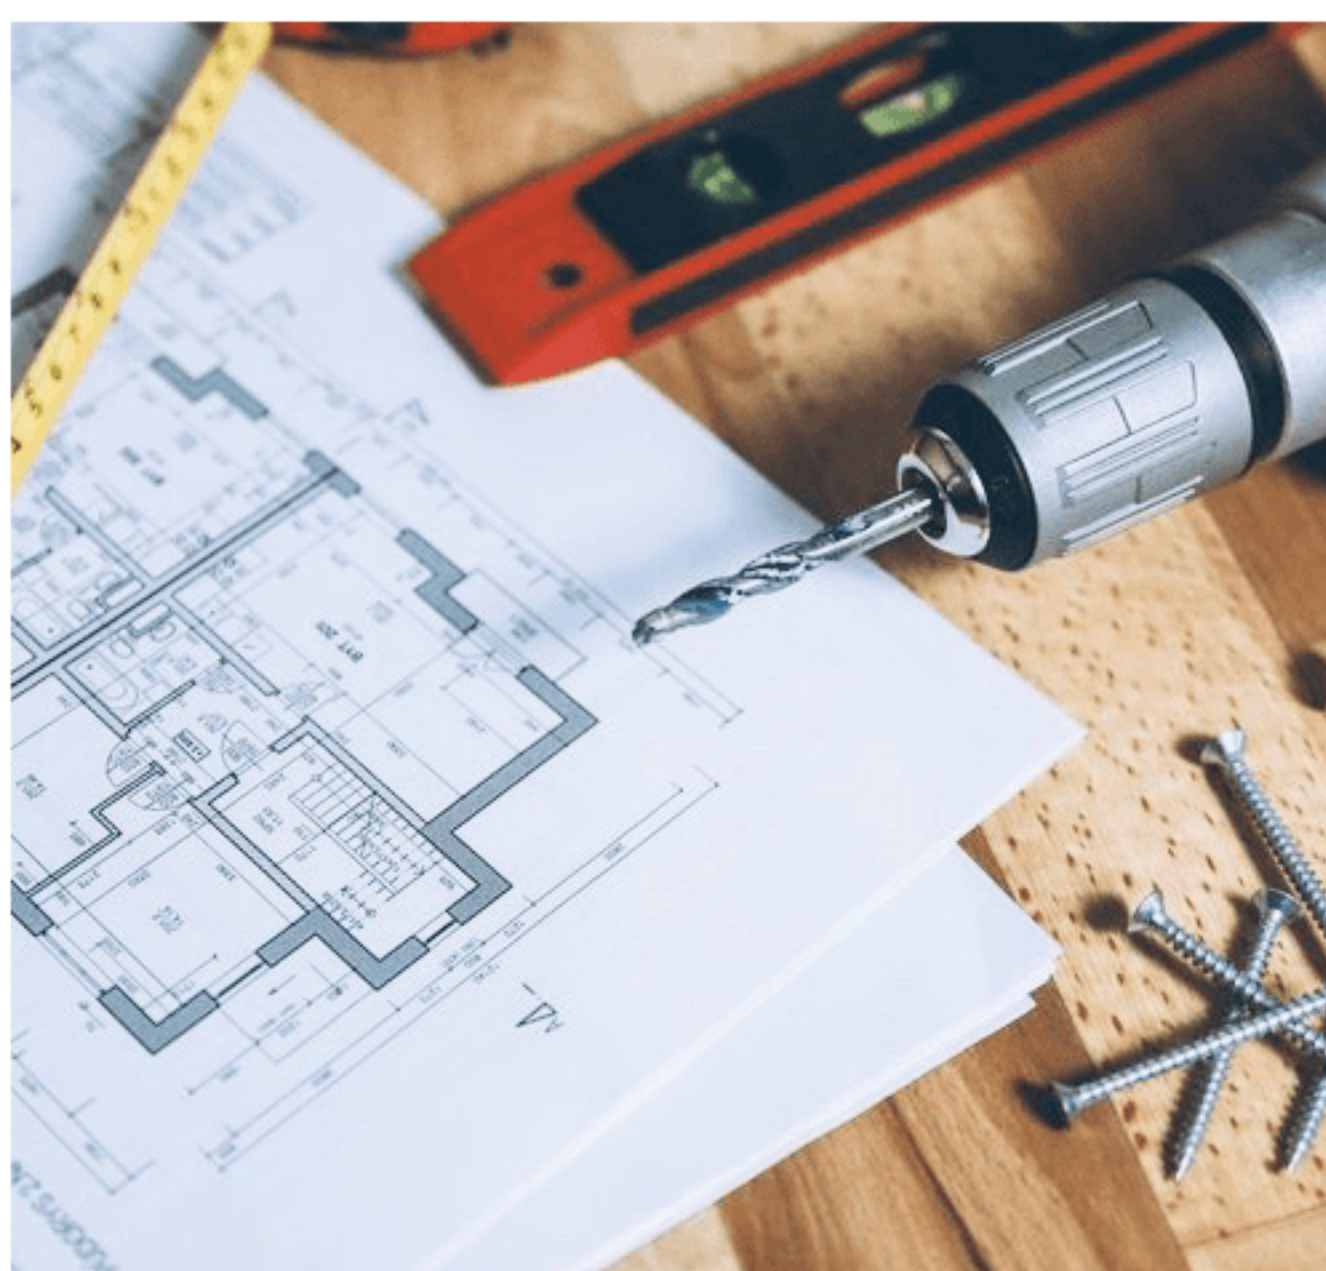

Phenolic & Epoxy Resin Countertops

Countertops are the workhorse of a laboratory and the most essential environment for storing tools, equipment, and documentation.

The Experts at LabDS can ensure that your countertops are made from a mixture of materials cured as a solid product ensuring durability in meeting harsh and extreme conditions.

OUR PROCESS

We care about results! From start to finish, LabDS accounts for every detail ensuring your satisfaction.

WE LISTEN TO YOU!

Whether you are developing a laboratory from scratch, upgrading, expanding, or renovating, we listen to your thoughts and ideas, helping craft them into a cost-effective solution.

OUR DESIGN TEAM TAKES YOUR VISION AND GIVES IT LIFE.

Our expert design engineers convert your sketches/descriptions into precise drawings that match your laboratory area and provide the best ergonomic and flow-efficient solutions.

E.C.E IS OUR STANDARD

Excellent Client Experience
Exceed Client Expectations.

WE DELIVER QUALITY FROM START TO FINISH!

We deal with only the highest quality manufacturers to ensure the best products for your project. We work with our suppliers to ensure a timely delivery of the products you need directly to your site. Our installers focus on the small details to ensure that you are happy down to the last nail.

OUR CLIENTS

For over 25-years, we've partnered with industry-leading organizations to deliver innovative solutions, excellent service, and top-tier support.

Our mission is centered on developing a joint understanding of our Clients needs, the expert deployment of experienced people, and coordinating valuable resources in decisively meeting and exceeding those specifications!

Committed to Results

We let our experience guide us, and our satisfied clients' results speak for themselves.

"We have been working with LabDS for over 20 years. They are a great partner for us. The entire staff is very professional, knowledgeable, and great to deal with. I highly recommend LabDS for all your needs." Vice President - Charlie Shami - AGR Fabricators

"BMC has been working with Lab Design and Supply since 1999. They have an exceptional team and are a pleasure to work with. I highly recommend them." BMC - Leading supplier of lab benches and fume hoods

"We have always had a positive experience working with Laboratory Designs. Should speak volumes that a company from Massachusetts is willing to work with a company that is out of state than locally. Scott is prompt with his estimates, lead times and pricing are competitive. Their quality is top notch. We would highly recommend." Julie Edwards - Operations Manager - Old Colony Cabinets Inc.

"I have had multiple compliments on the new lab Laboratory Design & Supply helped us construct. Your CAD services helped us greatly with the lab layout phase. The willingness of your installation crew to work according to our safety and quality guidelines also contributed to a successful project. In addition, I appreciate your willingness to complete punch list items in an expeditious manner." Josh Green - Senior Engineer - Wacker Chemie
