ADA Compliant vs. ADA Accessible

***33" height base cabinets are included here for your convenience.
A full selection of casework, furniture and equipment to ADA guidelines are
presented in the catalog section dedicated to ADA.***

A variety of basic casework cabinetry has been designed to complete the laboratory or classroom assembly requirements for the physically challenged.

Casework units are 22-1/2 inches deep; and, 34 inches high *overall*, inclusive of the one inch thick top material, which must be specified.

33" height base cabinets are included here for your convenience. However, for a full section of casework, furniture and equipment to ADA guidelines, please check the catalog section dedicated to ADA.

Numerous base cabinet design combinations meet the ADA's recommended dimensions. Work areas that meet the needs of the physically challenged are easily designed by including our casework assembly Lab Work Station, or our Kneespace Components.

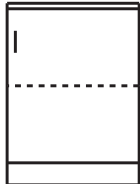

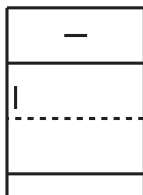

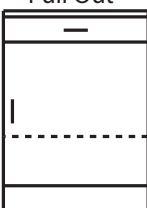

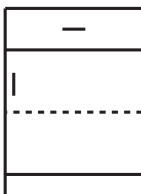

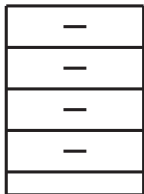

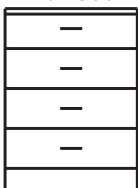

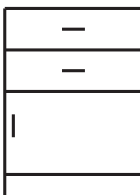

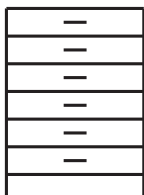

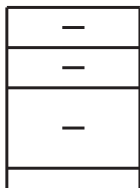

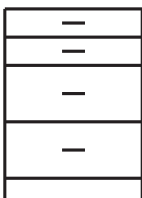

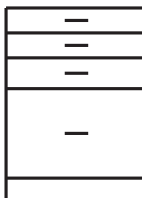

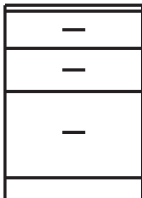

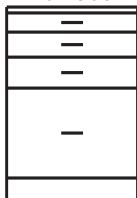

However, and quite obviously, some casework unit designs are more ADA *accessible* than others. Base cabinets in 41-1/4", 58-1/4", or even 70-1/4" widths, are available in the 33" height; however, the designer must weigh the placement, both in the casework assembly and in the overall room layout, for these units to be truly usable by persons restricted to wheelchairs.

CampbellRhea's Design Engineering and Drafting Departments are prepared to assist in the coordination of functional preliminary designs that will meet ADA guidelines in your project. Contact your CampbellRhea distributor for access to this design service.

Designers, architects and planners are advised to review and verify ADA requirements at the time of their project.

* ALL TABLES MEASURING 36" WIDE AND OVER ARE DOUBLE-FACED TABLES.

MODIFICATIONS AND SUFFIX NOTES:

- IF A TABLE 36" HIGH IS DESIRED, ADD THE SUFFIX -36- TO THE CATALOG NUMBER. EXAMPLE: 6500-36.
- IF A TABLE WITH TELESCOPING LEGS IS DESIRED, ADD THE SUFFIX -A TO THE CATALOG NUMBER.

EXAMPLE 6500-A

All tables shown in this schedule are built of FAS, or better grade Red Oak or White Maple, as specified.

Compartments are 16-1/2" W x 3" H x 15-5/8" D, I.D.

Drawers are 14-1/2" W x 2-1/4" H x 15" D, I.D.

Table legs are equipped with die formed chemical resistant, hard plastic polyethylene leg shoes, with closed bottoms. If specified, master keyed locks can be furnished on tables with drawers.

MAINSTAY™ : Metal Open Frame Tables

MAINSTAY, Metal Open Frame Tables

The black epoxy powder coated steel table frame - each side rail and two legs - is welded construction, with integral welded plate and welded 1/2" nut at attachment points inside the legs. Stabilizing end panel rail is attached with use of provided Allen wrench, 1/2" bolts and lock washers.

Tables are shipped knocked down. Front & back rails, and stabilizing end panels are predrilled for easy attachment of work surface. 1" thick, black Phenolic work surface is standard, and included. Each leg is equipped with a heavy-duty, 1" height adjustable threaded foot glide.

Work surface is shipped separately and overlaps the table frame by 1" on all sides. Other top materials are available if specified.

Dimensions below are overall and include the 1" work surface.

Adjustable Tables with Hand Crank

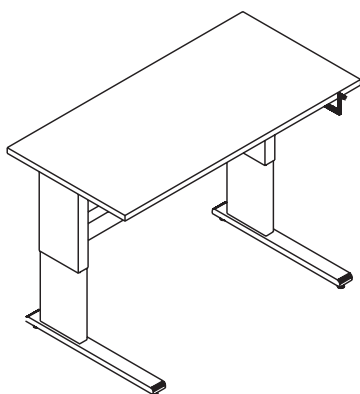

Unit can be used by a wheelchair-bound student, as a basic classroom table, or as a satellite table with tri-fascia service islands, #6190, or #6195; casework service islands #6182, or #6188. Unit allows great laboratory/classroom flexibility, since it can be adjusted in height for a variety of purposes, or used as a basic, classroom table that meets ADA guidelines. Tables will support a 500 lbs. static load.

The hand-crank adjustable pedestal is constructed from cold rolled steel, with a black finish. Pedestal has an integral stabilizing rail. Rail and legs are designed with cutouts and can be used as electrical raceways. Pedestal feet are equipped with four glides. The hand-crank's gearing mechanism is enclosed within the pedestal. Unit is shipped knocked down, and handle can be mounted to the left or right at the time of assembly. Handle slides out for cranking adjustments, and then slips back beneath the table top when not in use.

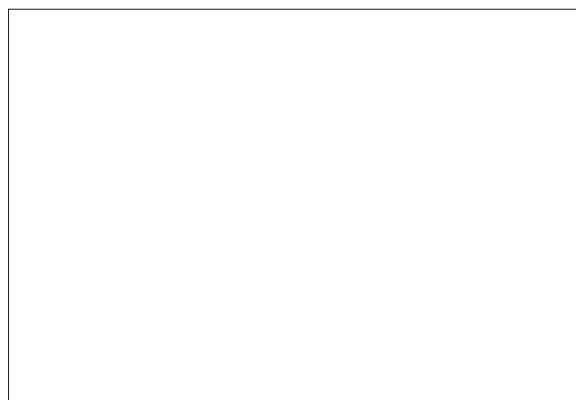

Top material is 1" thick Rheatex. Tables with wood frames have a height adjustment of 27" to 36"; tables without the wood frame adjust from 24" to 36". Floor space between pedestal feet varies between 36" W and 48" W; see individual units listed below. Tables with wood frames have a 3" x 3/4" solid oak frame.

Customize to Fit at Job site

- Components 22" Deep are for 24" Deep tops
- Components 28" Deep are for 30" Deep tops
- All rails are 4-7/8" High by 3/4" , solid oak
- Available in plain rails only
- Units with legs will be shipped with 35" High legs, unless specified otherwise.

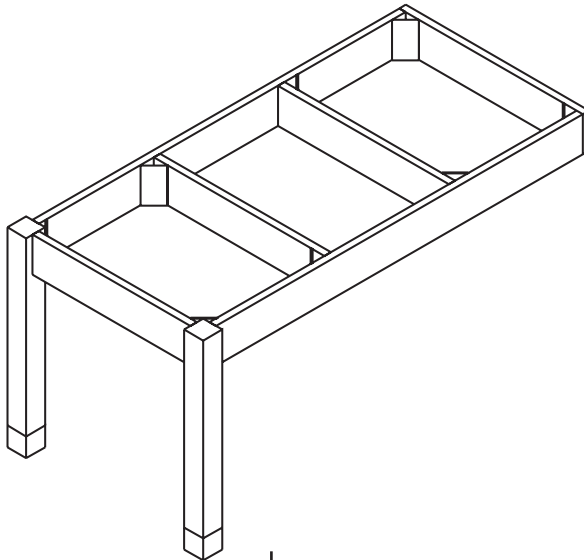

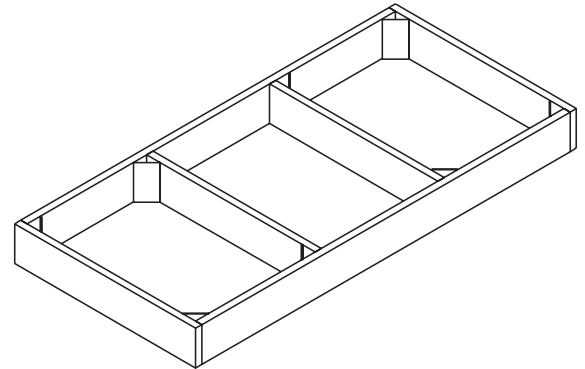

Designed to be used in casework assemblies, or with legs to right or left, and manufactured to be easily customized at the job site. Only available with plain rails, and in lengths listed. Lengths given are to be cut-to-fit . Shipped assembled, components may be dismantled, cut and reassembled to fit job site conditions (i.e., column in wall, sink in kneespace, offset walls, etc.). Leg height must be specified. Top is 1" thick, specify material.

Quantum™ Command Center

Front View

8844 Quantum™ Command Center

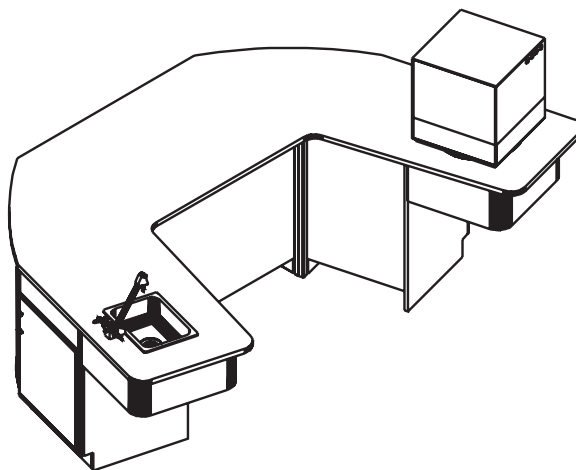

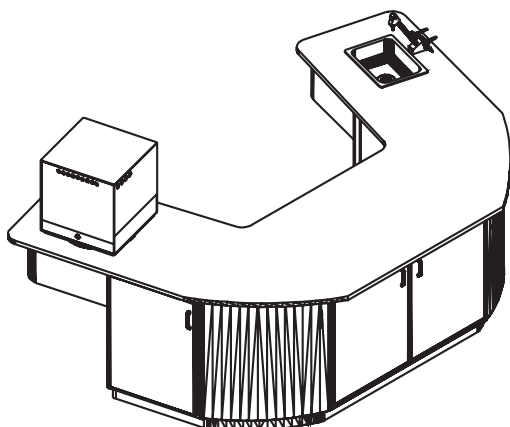

Dimensions:	W	H	D
Overall.....	120"	36"	30"

Incorporating classic good looks with practicality, functionality with convenience, and workspace with storage, the Quantum™ provides a full-service command center for today's technology based teaching formats. Quantum™ is designed with two double-faced storage cupboards accessible from either side. Standard cupboards are equipped with two adjustable shelves; however these may be replaced with pullout shelves to accommodate DVD or VCR players, audio systems or other multimedia equipment. The two end cabinets are provided with bottom mounted pullouts for storage of overhead projectors, ring stands, tall beakers, or any equipment requiring height. These two end cabinets can be equipped with a fixed shelf, or a two-shelf, lazy-susan for storage of smaller equipment.

The knee space is equipped with a pullout shelf, large enough to accommodate a computer keyboard & mouse. Pop-up data ports & electrical outlets are provided in the countertop for easy access by lap top or other electrical devices. A multi-service hot & cold water faucet with two fixtures for gas, & a 12" diameter round Corian sink and work surface are standard; contact your CampbellRhea representative for other top and sink options.

The end cabinet doors and the front of the knee space section (which is faced to match the end cabinet doors) are available with tambour, raised panel or custom Scandinavian style faces. Specify end cabinet door and knee space panel style.

Multi-Media Instructor's Command Center

Dimensions:	W	H	D
Overall	10'-8"	6'-0"	34"

Equipment: One 9529 combination cold water and gas fixture, one 9818 duplex electric receptacle. One 14" x 10" x 5" deep drop-in epoxy sink, one epoxy resin sink outlet, and two "EDP" grommets.

Unit is designed to accommodate both lab and lecture functions in the classroom, while maximizing both space and time available in a single classroom. Lecture side of table provides ample countertop room and access to a computer monitor and keyboard. When lab experiments are required there is ample work surface and a sink is provided for wash-up.

Storage cabinets at each end are accessible from both sides for easy cable management and/or plumbing. The center cabinet has one adjustable shelf and doors on the classroom side. The tambour door storage cases are each equipped with one pullout shelf for a printer or projector.

An optional, acrylic, rotating monitor enclosure with a black 3/4" phenolic resin base is available, if specified. Enclosure is vented to avoid monitor overheating. Swivel is aluminum with ball bearings. Cut out is provided in the countertop for cables.

Crossbar assembly with "C" clamp bases are available but sold separately.

(Note: Monitor, CPU and keyboard are not included.)

Navigator™ Technology Center

TRAPS, SERVICE PIPING AND ELECTRIC CONDUIT ARE NOT INCLUDED.

6125 Navigator™ Technology Center

Dimensions, Overall: 60" Diameter 34" H. standard
(Optional: 30" or 36" Heights)

The patented design of Navigator™ provides a full-service work arena for today's technology based laboratory formats.

Navigator™ is designed to provide water, gas, computer ports and electric service in a group work space, complete with storage compartments. Two access spheres, each containing two data ports and two electrical outlets, are mounted on the work surface for easy access by lap tops or other electrical devices. Navigaor™ is designed with an integral spill barrier around the sink. While allowing work with out the discomfort of a marine edge, this barrier provides protection from accidental spills for lap tops and paperwork .

Unit is equipped with two standard chrome multi-service fixtures with cold water and gas services; epoxy powder coated fixtures are available if specified. A 12" diameter round under-mounted Corian™ sink is standard with a Corian™ work surface. A variety of standard colors are available. Specify color selection. Additional top and sink options are available; confirm these options with your CampbellRhea dealer and specify.

The support shell base is manufactured of fire resistant fiberglass reinforced polyester resin. Four compartments incorporated into its design provide ample storage space for lap top computers or notebooks. Lap tops are not included. Navigator's design is naturally ADA compliant with optional 30" or 36" heights available.

*Chairs & lap top not included.

8834 Magnetar™ Adjustable Height Student Work Center

Dimensions:	W	H	D
Work Table	96"	30-36"	42"
Sink Cabinet	54-3/8"	34"	20-3/4"

The work center is designed to accommodate both lab and lecture functions while providing ample counter top space for four. A centralized work center provides access to computer, monitor, and wired or remote keyboard, while maximum counter space remains available for lab experiments when required.

There is an optional rotating monitor enclosure available for the work center. When specified it will accommodate up to 17" diagonal monitors. Base is a wood clad, metal storage cabinet, with pull-out shelf that provides ample space for securing CPU, hardware and printer. (CPU, monitor, hardware and printer are not included.)

The work top is infinitely adjustable from 30" to 36", allowing the table to be ADA accessible or used by standing or seated students not requiring ADA compatibility. The top is adjusted by an electric actuator using a key switch in the sink cabinet, and requires no special tools for adjustment.

The ADA compliant sink cabinet is at a fixed height of 34", and is equipped with two combination cold water and gas fixtures, two GFCI duplex electric receptacles, a 14" x 10" x 5" D drop-in sink.

Specify top material required. Optional mobile 3-drawer cabinets with specified 1" top material are available if specified. These mobile units match the Magnetar casework, and are equipped with 2 lockable casters.

For testing purposes, optional privacy panels with storage unit are available if specified. Contact your CampbellRhea dealer for further detail.

Vertex™ Laboratory Table & Sink

8828 Vertex Table

Dimensions:

Adjustable Height Table : 30" x 41"

Table can be adjusted in the field to have a lesser range of movement, if desired. Example: 31" x 36".

Work Surface: 84" L x 36" W

Table is constructed from 14-gauge steel tubing, satin black polyester powder coated. Height is infinitely adjustable between 30" and 41". Table mechanism is driven by electric actuator with limit switches to control stops. Table is capable of lifting a 500 lb. static load. Table comes with 16 gauge modesty panels that enclose the lift mechanism. Wood finish panels are available to attach over steel modesty panels, if specified.

Unit is provided with a 6 ft. long power cord and requires a 120 volt 20 amp power supply. Legs are brushed aluminum. Black polyester coated feet are equipped with adjustable glides.

Unit is equipped with four book bag hooks, rod storage area for two rods, and an electric/data raceway. Two electric receptacles and four data outlet mounting plates are furnished. Data outlets to be provided by others. Table comes standard with plug and play switch module that allows the teacher to adjust the table as needed. Table mounted "Local Control Switch" is available, if specified.

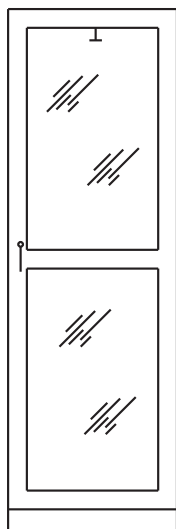

The switch module unplugs and may be stored away from the unit when not in use. Pop-up, tilt-up or pedestal electric access may be furnished instead of elec/data raceway, if specified. 1" thick top must be ordered separately, specify material.

For testing purposes, optional privacy panels (#8838) and panel storage unit (#) are available; order separately.

6116 Student Table: Combined Sciences

Dimensions, Overall:

36" H x 56" Square
67-3/16" across corners
39" on four sides & 12" on four sides

Work surface is 1" thick chemical resistant epoxy resin, installed height is 36". Standard color is black. The work surface perimeter has an integral, 1/4" raised marine edge.

Equipment: One 12" diameter epoxy resin sink, 7-1/2" in depth; one polypropylene sink outlet, two multi-service fixtures for cold water and gas; four rod sockets; and two GFCI electric receptacles.

The work surface is supported by a natural almond colored, molded fiberglass reinforced polyester shell, rated as non-burning per A.S.T.M., D-635 burn test. The shell is structurally reinforced and provides a complete protective envelope for plumbing and electrical wires. Support shell has removable access panels. The support shell is designed to accept four suspended storage cabinets; specify cabinet selection by suffix A, B, C, D, E or F following unit number. The black, electrostatically epoxy powder coated pedestal base is constructed of 10-gauge formed steel, and equipped with two removable access panels. The base is 20" square with 1/4" thick steel plates inside for attaching the pedestal to the floor. Traps, internal piping and internal electrical wiring are not included.

6118 Student Table: Combined Sciences

Same as #6116, except equipped with one epoxy resin trough. I. D., 51" W x 9" D and, 4 1/4" depth. The trough is designed to accept a two piece trough cover; not included, must specify.

6112BX Reagent Basket

Expanded metal basket with chemical resistant black finish, shaped to fit into trough on #6118 and #6119 Units.

6119 ADA Compliant Student Table: Combined Sciences

Dimensions, Overall:

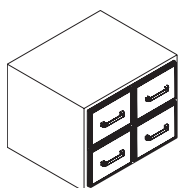

36-3/4" H x 56" Square
67-3/16" diagonal with trough
72-3/4" diagonal, perpendicular to trough
9" on four sides; 12" on two sides; and, 17-1/2" on two sides.

This table is designed to be compliant with ADA guidelines. The bi-level work surface provides four student stations, two with wheelchair access, and two with suspended cabinets.

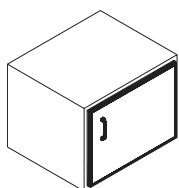

Work top provides access at two levels. At installation the height of the bi-level top is at 36" and 34". Work surface is 1" thick chemical resistant epoxy resin. Standard color is black. The work surface perimeter has an integral, 1/4" raised marine edge.

Equipment: One epoxy resin trough. I. D., 51" W x 9" D and, 4 1/4" depth; one polypropylene sink outlet, two multi-service fixtures for cold water and gas, each equipped with wrist handles; four rod sockets; and two GFCI electric receptacles.

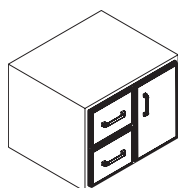

The black epoxy resin work surface accommodates a maximum length trough with services at each end. The trough is designed to accept a two piece trough cover; not included, must specify. The work surface is supported by a natural almond colored, molded fiberglass reinforced polyester shell, rated as non-burning per A.S.T.M. D-635 burn test. The shell is structurally reinforced and provides a complete protective envelope for plumbing and electrical wires. Support shell has removable access panels. The support shell is designed to accept two suspended storage cabinets; specify cabinet selection by suffix A, B, C, D, E or F following unit number. 6230 - C Eight Student Chemistry Table

Same as 6230 -A except with style "C" base cabinet shown above.

These General Chemistry Tables provide approximately three lineal feet of work top and one 3 foot base cabinet for each student. Optional base cabinets provide for 2, 3, or 4-sections. Full height cupboards have one adjustable shelf.

Equipment: Eight single gas cocks; four cold water cocks; four duplex AC receptacles; one epoxy drain trough; one end sink; one polypropylene sink outlet; one cold water bibb cocks.

Work top is 1" thick - specify material desired.

6232 - A Ten Student Chemistry Table

(Ten base cabinets with 20 drawers and 20 cupboards)

Work Top: 14' 11-1/2" L x 53-5/8" W x 36" H.

Work top is 1" thick - specify material desired.

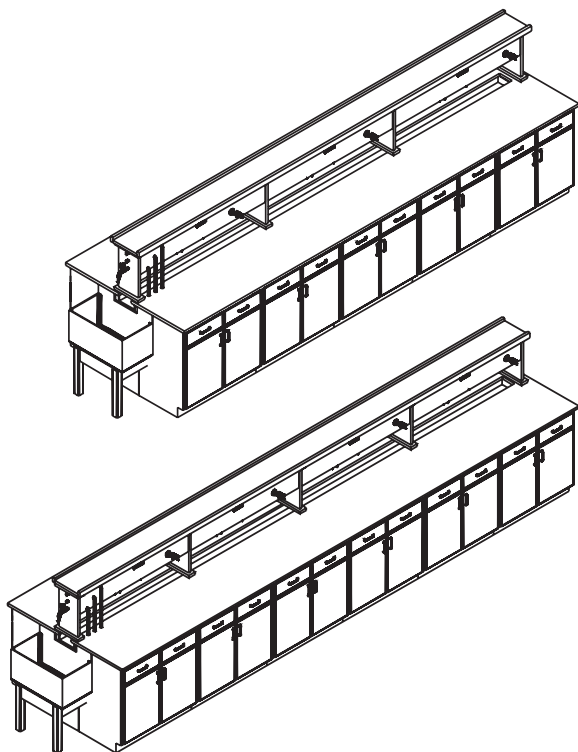

Equipment: Ten single gas cocks; five cold water cocks; six duplex AC receptacles; one epoxy drain trough; one end sink; one polypropylene sink outlet; one cold water bibb cock.

6232 - B Ten Student Chemistry Table

Perimeter Unit/Base Cabinets - 24" Wide

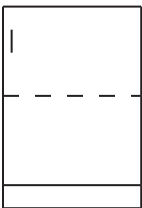

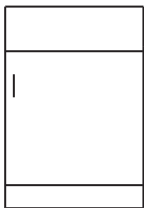

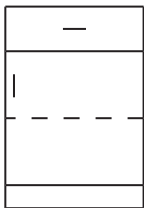

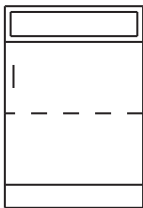

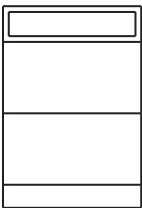

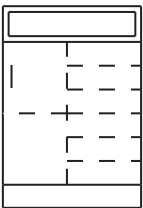

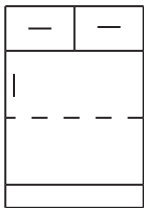

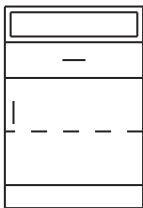

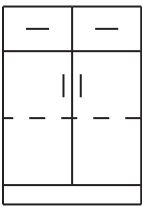

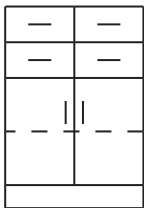

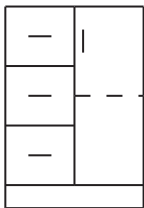

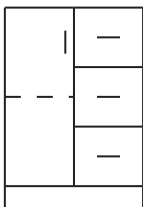

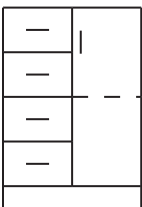

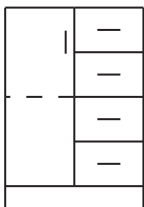

Base cabinets used with perimeter table styles "6A" through "6P" are selected here.

All cabinets are 35" H x 16" D.

The number beside drawers indicates the quantity of that size drawer necessary to equal the full-height of the cabinet.

Drawers are 13" D, ID and equipped with locks. Cupboards are 14" D, ID.

Shelves are full depth and adjustable.

Assembly designed to include provisions for wheelchair space at sink and services. Rinse counter provides a long sloped counter, integral sink, continuous raised edges and coved corners to retain spilled materials and liquids. Top assembly is one piece, fiberglass reinforced polyester, almond in color, with highly durable surface. Sink assembly has bi-level work surfaces to accommodate recommended maximum 34" wheelchair height and 36" for stand up height. Stand up work surface slopes toward wheelchair work surface, which in turn, slopes toward integral sink. Molded integral sink is sloped from front to back with overall depth not to exceed 6-1/2" D. A molded integral ledge is located at rear of sink to accommodate services. Casework assembly consists of one, 1278L cabinet, and one 2338 sink cabinet (without sink hangers). A removable one piece closure panel conceals sink service piping. Unit has one hot and cold water mixing faucet with wrist blade handles.

ADA compliant at 34" H., or 36" H., for general use. Specify height desired.

Equipment: Three, multi-service fixtures, each containing one cold water faucet and two gas cocks; three duplex G F I C receptacles; and one polypropylene sink outlet with strainer.

Both the work surface and the support shell are molded fiberglass reinforced polyester, and rated as not burning per A.S.T.M., D-635 burn test. A black vinyl-ester gel coating provides exceptional chemical resistance for the work surface, sink and raised service turrets. The work surface perimeter has an integral, 1/4" raised marine edge. The work surface is supported by a natural almond colored, molded fiberglass reinforced polyester shell. The shell is structurally reinforced and provides a complete protective envelope for plumbing and electrical wiring. The 20" x 20" square pedestal base is black electrostatically epoxy powder coated, steel and has two removable access panels.

Sink, I D..... 19-1/2" on three sides x 15-1/4" on three sides,
and 7" Depth.

Equipment: Three multi-service fixtures containing one cold water faucet and two gas cocks; three duplex G F C I receptacles; and one polypropylene sink outlet with strainer. Two hose assemblies (one cold water & one gas), each 36" long with 1/2" male pipe threads at top and two-way, quick-connect couplings at floor. Gas socket and cold water plug, both with 1/2" female threads, to be connected by plumbing contractor to service rough-ins in floor pit. One 1-1/2" waste hose assembly 30" long with hose clamp and tailpiece at top for connecting to sink outlet and straight through, quick-connect coupling at floor. Socket with 1-1/2" female pipe threads to be connected by plumbing contractor to the waste stub-up in floor pit.

Work surface, sink and raised service turrets are molded in one piece from black fiberglass reinforced polyester. An integral raised marine edge is incorporated at the work surface perimeter. Work surface is supported by a molded fiberglass reinforced polyester shell, in natural almond color. The shell is structurally reinforced and provides a complete protective envelope for plumbing and electrical wires. The fiberglass work surface and the support shell are fabricated of vinyl-ester gel coats and special polyester resins formulated to provide exceptional chemical resistance and rated as not-burning per A. S. T. M., D-635 burn test. The hexagon pedestal base is 10 gauge formed steel finished black and has two removable access panels. The three feet have nonskid, composition bottom leveling glides.

Cold water and gas piping within the support shell connecting the fixtures to each other and to the hose assemblies must be furnished and installed by the plumbing contractor. Traps must be furnished by and installed below the floor level by the plumbing contractor. Electrical wire and conduit connecting the receptacles within the support shell must be furnished by and installed by the electrical contractor and must terminate with a flexible cord and a 3-wire, grounded plug.

Tri-Fascia Ventilation Enclosure/Service Island

6198 Tri-Fascia Ventilated Work Center/Service Island

Dimensions:

Overall	70" W x 84" H
Work Surface	35-3/4" W on three sides, 20-3/4" W on three sides, and 36" H.

Caution: This is not a Fume Hood and must not be expected to function as one. Please refer to CampbellRhea's LabShield™ Fume Hood catalog if fume hood is desired.

Equipment: One multi-service fixture containing one cold water faucet and two gas cocks; three duplex G F I C receptacles; and one epoxy resin oval cup sink, 3" x 6"; three rod sockets with three, 18" burette rods; three vapor-tight incandescent light fixtures (bulbs are not included) and one light switch. Top is 1" Rhearesin. Blower, motor and switch must be ordered separately.

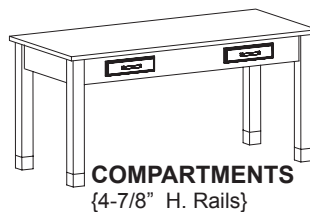

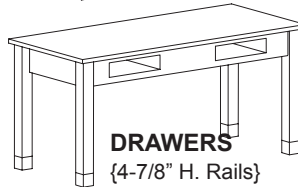

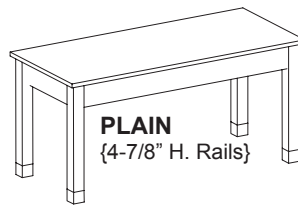

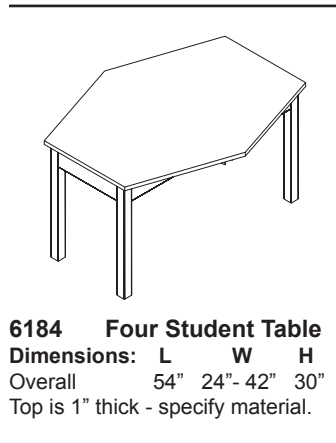

Access to the work center is gained through three openings, 44" W and 28" H. Each opening is equipped with a hinged, 19" safety panel, which can be lowered to increase air velocity through the hood opening.

The support shell and the top of the superstructure are molded of glass- reinforced polyester with a chemical resistant smooth surface coating, white in color. The 20" square pedestal base is constructed of 10 gauge formed steel, finished black, and has two removable access panels.

The sides of the superstructure are constructed of shaped, 1/4" smoke colored polycarbonate panels. Three vapor-tight light fixtures (bulbs not included) are provided in the superstructure.

The 8-5/8" diameter center exhaust column provides exhaust at the work surface or at the top plenum, depending on the positioning of the damper. An 11" diameter exhaust duct stub is provided in the top of the superstructure for exhausting through the ceiling. Pressure drop through the hood will not exceed 3/4" W.C. Exhaust volume required equals 1500 C.F.M.

EXAMPLE 6500-A

All tables shown in this schedule are built of FAS, or better grade Red Oak or White Maple, as specified.

Compartments are 16-1/2" W x 3" H x 15-5/8" D, I.D.

Drawers are 14-1/2" W x 2-1/4" H x 15" D, I.D.

Table legs are equipped with die formed chemical resistant, hard plastic polyethylene leg shoes, with closed bottoms. If specified, master keyed locks can be furnished on tables with drawers.

MAINSTAY™ : Metal Open Frame Tables

MAINSTAY, Metal Open Frame Tables

The black epoxy powder coated steel table frame - each side rail and two legs - is welded construction, with integral welded plate and welded 1/2" nut at attachment points inside the legs. Stabilizing end panel rail is attached with use of provided Allen wrench, 1/2" bolts and lock washers.

Tables are shipped knocked down. Front & back rails, and stabilizing end panels are predrilled for easy attachment of work surface. 1" thick, black Phenolic work surface is standard, and included. Each leg is equipped with a heavy-duty, 1" height adjustable threaded foot glide.

Work surface is shipped separately and overlaps the table frame by 1" on all sides. Other top materials are available if specified.

Dimensions below are overall and include the 1" work surface.

Unit can be used by a wheelchair-bound student, as a basic classroom table, or as a satellite table with tri-fascia service islands, #6190, or #6195; casework service islands #6182, or #6188. Unit allows great laboratory/classroom flexibility, since it can be adjusted in height for a variety of purposes, or used as a basic, classroom table that meets ADA guidelines. Tables will support a 500 lbs. static load.

The hand-crank adjustable pedestal is constructed from cold rolled steel, with a black finish. Pedestal has an integral stabilizing rail. Rail and legs are designed with cutouts and can be used as electrical raceways. Pedestal feet are equipped with four glides. The hand-crank's gearing mechanism is enclosed within the pedestal. Unit is shipped knocked down, and handle can be mounted to the left or right at the time of assembly. Handle slides out for cranking adjustments, and then slips back beneath the table top when not in use.

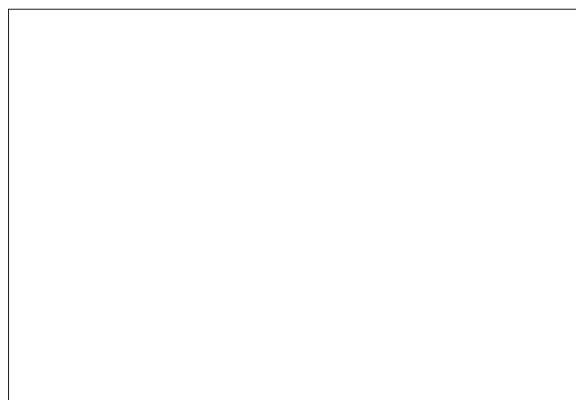

Top material is 1" thick Rheatex. Tables with wood frames have a height adjustment of 27" to 36"; tables without the wood frame adjust from 24" to 36". Floor space between pedestal feet varies between 36" W and 48" W; see individual units listed below. Tables with wood frames have a 3" x 3/4" solid oak frame.

ADA Compliant vs. ADA Accessible

A variety of basic casework cabinetry has been designed to complete the laboratory or classroom assembly requirements for the physically challenged.

Casework units are 34 inches high *overall*, and 22-1/2 inches deep.
One inch thick top material must be specified.

Numerous base cabinet design combinations meet the ADA's recommended dimensions. Work areas that meet the needs of the physically challenged are easily designed by including our casework assembly Lab Work Station, or our Kneespace Components.

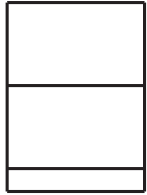

However, and quite obviously, some casework unit designs are more ADA *accessible* than others. Base cabinets in 41-1/4", 58-1/4", or even 70-1/4" widths, are available in the 33" height; however, the designer must weigh the placement, both in the casework assembly and in the overall room layout, for these units to be truly usable by persons restricted to wheelchairs.

CampbellRhea's Design Engineering and Drafting Departments are prepared to assist in the coordination of functional preliminary designs that will meet ADA guidelines in your project. Contact your CampbellRhea distributor for access to this design service.

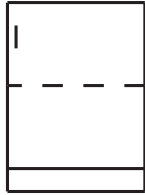

Casework in this specialized section has been designed to dimensionally meet ADA guidelines for accessibility; however, designers, architects and planners are advised to review and verify ADA requirements at the time of their project.

Kneespace Components: ADA Compliant

Kneespace components for ADA accessibility are designed for use in casework assemblies, or with legs to the left or right. Leg height of 33" must be specified. The 4-7/8" H x 3/4" solid lumber front rails are machined to allow appropriate clearance for use in ADA accessible areas. The ADA guidelines state that kneespace components allow a minimum of 30" of machined clearance area; therefore, components are available in 35-1/4", 41-1/4" or 47-1/4" widths.

Assembly designed to include provisions for wheelchair space at sink and services. Rinse counter provides a long sloped counter, integral sink, continuous raised edges and coved corners to retain spilled materials and liquids. Top assembly is one piece, fiberglass reinforced polyester, almond in color, with highly durable surface. Sink assembly has bi-level work surfaces to accommodate recommended maximum 34" wheelchair height and 36" for stand up height. Stand up work surface slopes toward wheelchair work surface, which in turn, slopes toward integral sink. Molded integral sink is sloped from front to back with overall depth not to exceed 6-1/2" D. A molded integral ledge is located at rear of sink to accommodate services. Casework assembly consists of one, 1278L cabinet, and one 2338 sink cabinet (without sink hangers). A removable one piece closure panel conceals sink service piping. Unit has one hot and cold water mixing faucet with wrist blade handles.

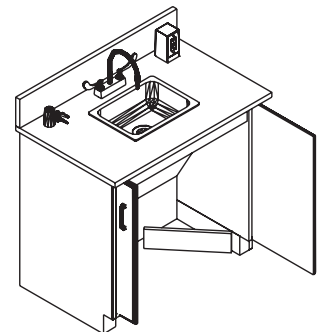

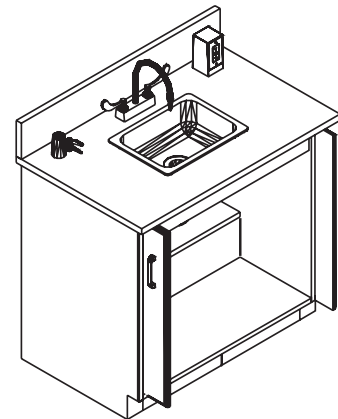

ADA Accessible, Casework Lab Station

8774 Casework Laboratory Work Station

Dimensions	W	D	H
Overall.....	36-3/4"	24"	33"

Equipment: One epoxy resin sink, 15" x 11" x 5-1/2" O.D.; one hot and cold water gooseneck faucet with 4" wrist handles and aerator; one single gas cock; one duplex AC pedestal receptacle, GFCI type, 20 amp; one, 1-1/2" epoxy resin sink outlet; one #9632 "P" trap assembly. One inch thick top with 1/4" thick, flush fitting sink cover; specify top material.

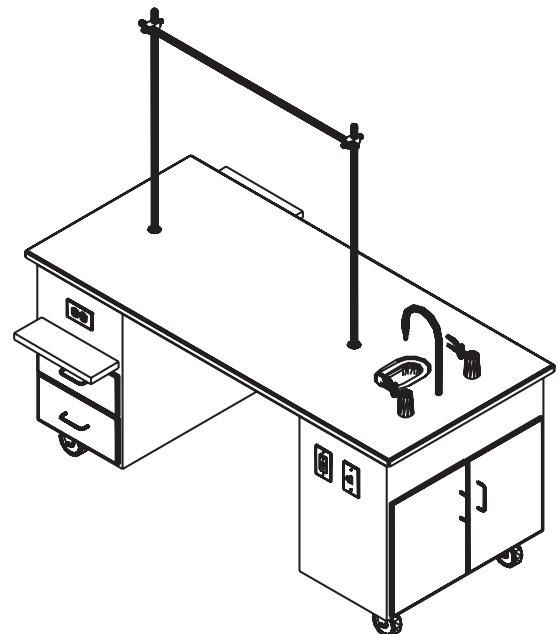

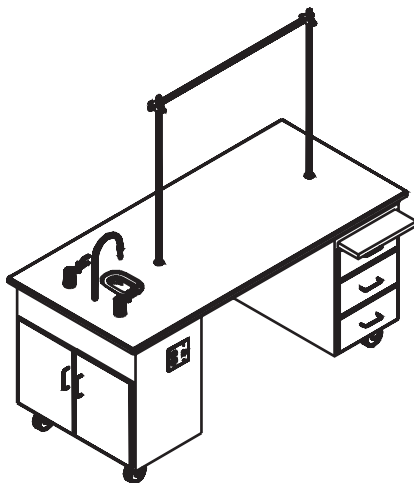

Sink cabinet is rigidly constructed with a full horizontal top frame, top vertical rails at front and rear, and a vertical rear panel at bottom for additional rigidity. Double-walled end panels provide space for retraction of pocket doors. Door pulls are AL-2 style, a 3/8" round aluminum wire type, 4-3/8" long for ample finger hold. Doors do not extend more than 1" past front edge of counter top when in full retracted position. Toe rails fold back, and cupboard bottom hinges up and locks in place to cover sink, trap and piping. In up, locked position, this provides approved clearance space for wheelchair access. Interior side panels are removable for access to door hardware. All interior panels are oak plywood finished to match exterior casework.

Mobile, ADA Accessible Lab Station

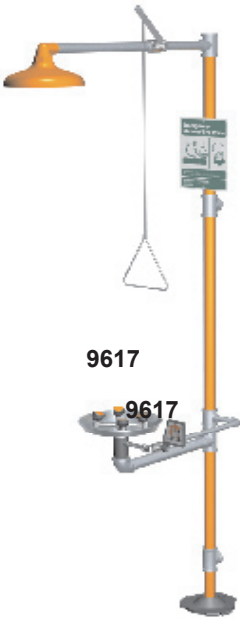

6007 Mobile, ADA Accessible Lab Station

Dimensions:	W	D	H
Overall.....	65-3/4"	30"	32"
Wheelchair access.....	32"	30"	30"

Equipment: One cold water fixture with electric pump and two 3-way switches. One each, 2-1/2 gallon polyethylene carboy for supply and waste. One epoxy resin cup sink, 3" x 6" diameter. One gas cock and one air cock with 10 foot supply hose. (Note: Gas and air supply must be provided from fixed sources in classroom or lab. As a safety precaution, no propane, gas or oxygen cannisters should be contained within the unit.) Four, 5" diameter casters - two rigid, two swivel with locks. One aluminum crossbar assembly with two rod sockets. One 25 foot electric supply cord, 16-3SJ with plug (NEMA S-15P), one automatic rewind reel. Carboys, electric pump and cord with its rewind wheel are housed in the two door cupboard on one end of unit. The other end unit has two drawers with a pullout board on one side, and three drawers with a pullout writing board on the opposite side. Unit is equipped with three duplex, 15 amp, 120 volt AC receptacles; one is GFCI type for complete circuit protection. Support frame for top is 1" x 2-1/2" steel tubing, with black acid resistant finish. Top is 1" thick - specify material desired.

ADA Barrier-Free Safety Center & Safety Station

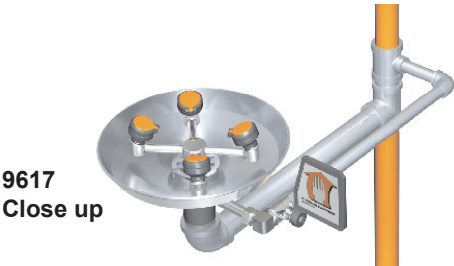

9617 Barrier-Free Emergency Shower & Eyewash

Dimensions: Overall, 7'6" H.

Equipment: 10" diameter orange ABS plastic shower head extends 32" from support pipe, allowing wheel chair maneuverability. A Full flow, stay-open valve is operated by the pull rod and handle. Shower operates until handle is pushed up to close valve. Pull rod has been lengthened to 38" for accessibility.

The eye and face wash unit has a 12" stainless steel bowl and four gentle spray outlet heads, each with a self-regulating volume control, removable spray cover, and a reticulated polyurethane filter to remove particles from the water. The frame assembly is extended 25" from the support pipe and lowered to 31" high to be accessible from a wheel chair. The full flow stay-open ball valve is operated by a die cast aluminum flat/paddle handle, 26-1/2" from the floor. Eye/face wash operates until the valve is manually closed.

Unit is furnished with a 9" diameter aluminum floor flange and intermediate galvanized pipe and fittings. Both inlet and outlet are 1-1/4" IPS female.

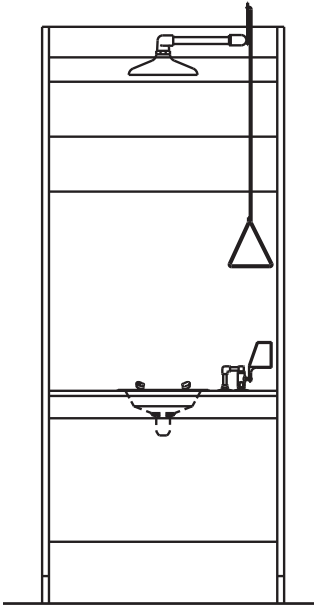

6774A Barrier-Free Safety Center

Dimensions Overall	W	D	H
	35-1/4"	22-1/2"	84"

Lower section is designed to provide access for a wheelchair to the eyewash fountain, and specially designed offset shower head with extended pull rod. Closure panels conceal service piping.

Upper section with two fixed shelves provides storage space for sand bucket, blankets, fire extinguisher, first-aid kit and other emergency supplies (not included)

Equipment One stainless steel surface mounted eyewash fountain; one emergency shower head with pull chain. Deck top is 3/4" white laminated plastic.

9622 ADA Accessible Recessed Eye Wash with Drain Pan

Handicapped accessible wall mounted eye/face wash with stainless steel cover and drain pan. Opening cover pulls outlet head assembly down from vertical to horizontal position and activates water flow. Horizontal grab bar is easily grasped and pulled in an emergency. While unit is in operation, waste water is collected by drain pan and returned into unit for drainage. Unit remains in operation until cover is returned to a closed position.

Spray head assembly has two spray heads mounted on supply arms. Each spray head has internal flow control and filter to remove impurities from water.

Valve: 1/2" IPS brass stay-open ball valve. 1/2" IPS female inlet. Waste 1-1/2" OD chrome plated brass.

Adjustable Tables with Hand Crank

Unit can be used by a wheelchair-bound student, as a basic classroom table, or as a satellite table with tri-fascia service islands, #6190, or #6195; casework service islands #6182, or #6188. Unit allows great laboratory/classroom flexibility, since it can be adjusted in height for a variety of purposes, or used as a basic, classroom table that meets ADA guidelines. Tables will support a 500 lbs. static load.

The hand-crank adjustable pedestal is constructed from cold rolled steel, with a black finish. Pedestal has an integral stabilizing rail. Rail and legs are designed with cutouts and can be used as electrical raceways. Pedestal feet are equipped with four glides. The hand-crank's gearing mechanism is enclosed within the pedestal. Unit is shipped knocked down, and handle can be mounted to the left or right at the time of assembly. Handle slides out for cranking adjustments, and then slips back beneath the table top when not in use.

Top material is 1" thick Rheutex. Tables with wood frames have a height adjustment of 27" to 36" ; tables without the wood frame adjust from 24" to 36". Floor space between pedestal feet varies between 36" W and 48" W; see individual units listed below. Tables with wood frames have a 3" x 3/4" solid oak frame.
